**Answer: C**

Ministry of Housing and Housing Affairs (MoHUA) launched the field assessment of Swachh

Survekshan (SS) 2021, the sixth edition of the annual cleanliness survey conducted by the Government of India, at a web event in New Delhi. A New Performance category called 'Prerak Dauur Samman' has been announced as part of Swachh Survekshan 2021, where cities will be rewarded for their performance based on indicators from SS-2021 'Service Level Progress'.

- They have a total of 5 additional subcategories called – Divya (Platinum), Anupam (Gold), Ujjwal (Silver), Udit (Bronze) & Aarohi (Aspiring).

SS2021 will be categorised on the basis of six select Indicators. They are

- Segregation of Waste into Wet, Dry and Hazard Categories
- Processing capacity against wet waste generated
- Processing and recycling of wet & dry waste
- Construction and Demolition waste processing
- Percentage of waste going to landfills
- Sanitation status of cities

SS was introduced by MoHUA in 2016 as a competitive framework to encourage cities to improve the status of urban sanitation while encouraging large scale citizen participation. Since its launch in 2014, Swachh Bharat Mission-Urban (SBM-U) has made significant progress in the area of both sanitation and solid waste management. 4360 Urban ULBs have been declared ODF, 2158 cities certified ODF+ and 551 cities certified ODF++.

In the area of solid waste management, 97% of wards have 100% door-to door collection while 68%

of the total waste generated is being processed. A total of six cities have been certified as 5 Star, 86 as 3 star and 65 as 1 star under the Star Rating Protocol for Garbage Free Cities.

- (a) 450 million tonnes
- (b) 350 million tonnes
- (c) 250 million tonnes
- (d) 200 million tonnes
- (e) 300 million tonnes

**Answer: A**

Global emissions from the electricity sector dropped by 450 million tonnes in 2020. This resulted partly from lower electricity demand but also from increases in electricity generation by solar photovoltaic and wind.

Global carbon dioxide emissions dropped by 5.8% in 2020 as the covid-19 pandemic brought economies to a standstill but rebounded in December 2020.

This was the largest annual drop in global energy-related carbon dioxide emissions since World War II.

China, the world's biggest emitter of greenhouse gases, was the only country that experienced an increase in emissions last year; it rose 0.8%, or 75 million tonnes, from 2019 levels.

If current expectations for a global economic rebound this year are confirmed, and in the absence of major policy changes in the world's largest economies, global emissions are likely to increase in 2021.

- (a) 2011
- (b) 2013
- (c) 2016
- (d) 2008
- (e) 2005

**Answer: C**

India's central bank has sought to retain its current inflation target of 4%, with a two percentage-point latitude either side, seeking to build confidence in the broader economy that is still prone to both supply shocks and sudden demand shrinkage.

The current numerical framework for defining price stability, i.e., an inflation target of 4%, with a +/-2% tolerance band, is appropriate for the next five years.

The flexible inflation targeting (FIT) framework was enacted in 2016 as the monetary policy architecture for India.

The latest RBI report indicates no drastic shift in the central bank's policy stance, although Mint Road acknowledged the need for flexibility in the event of unforeseen deviations in the future from the assumptions made now.

Since 2016, the pace of economic expansion slowed - to 4% in FY20 from 8.3% in FY17.

- (a) 2025
- (b) 2030
- (c) 2035
- (d) 2042
- (e) 2040

**Answer: B**

UN Chief described 2021 as a "make or break year" following the release of a UN Framework Convention on Climate Change (UNFCCC) report analyzing the updated climate action plans submitted by 75 nations ahead of November's COP26 climate summit which found that current policies won't come close to meeting the goals of the Paris Agreement.

The UN Chief stated that now is the time the global coalition committed to net-zero emissions by 2050 is

growing, across governments, businesses, investors, cities, regions and civil society.

According to the UN Intergovernmental Panel on Climate Change, the population must reduce its 2030 CO2 emissions by about 45 per cent from 2010 levels and reach net zero by 2050 to ensure this temperature limit goal is reached.

The report showed that that the revised climate action plans -- which cover 40% of countries party to the 2015 Paris Agreement that account for 30% of global emissions -- would only deliver a combined emissions reduction of 0.5% from 2010 levels by 2030.

The RBI removed IDBI Bank from its enhanced regulatory supervision or Prompt Corrective Action (PCA) framework after a gap of nearly four years on improved financial performance.

The Reserve Bank of India (RBI) had placed IDBI Bank under PCA framework in May 2017, after it had breached the thresholds for capital adequacy,

asset quality (net NPAs was over 13 per cent in March 2017), return on assets and the leverage ratio.

The bank has provided a written commitment that it would comply with the norms of minimum regulatory capital, net NPA and leverage ratio and has apprised the RBI of the structural and systemic improvements that it has put in place which would help the bank in continuing to meet these commitments.
